

CiF Lab Solutions Ascent Series™ Tables

▶ Product Data Sheet

- **Flexibility:** The table system is adaptable to accommodate any new discipline or research needs.
- **Strength of Construction:** Available in mechanically fastened knock down version or with fully welded fastener configuration.
- **Full Product Offering:** Single-sided units can be used in perimeter positions or be ganged together for island and peninsula requirements.
- **Service Integration:** Vertical uprights double as chases, coming pre-wired and pre-plumbed to accommodate various gas, vacuum, air, data and power requirements.
- **Highest Quality Materials:** Appropriate gauges of US Steel and SEFA compliant powder coat paint finishes are integral to our commitment to quality.

Key Features

Flexibility	Easily reconfigured with adjustability of the work surface height (29"-35"), shelving on 1" increments and removable components to allow for equipment placement without disruption of the services
System Strength	Independent Third Party Tested to SEFA-10 Category 4 (1200 lb.) load ratings.
Full Product Offering	Table frames are available in 30" and 36" D units and 48", 60", 72", 84" and 96" W units, with a broad range of optional features listed on the back page.
Industry Compliance	CiF delivers product solutions that meet performance criteria and contribute to project regulatory standards such as SEFA, LEED, UL and cJUL components; including a UL962 total assembly rating on certain versions.
True to Your Vision	CiF has built a reputation on providing high quality products which meet and exceed the requirements of owners, designers, planners and architects. We pride ourselves in providing innovative solutions for demanding quality driven clients who have very specific requirements. At CiF we always take pride in our work and we are always "True to Your Vision".
