

**Project Name: Framingham State University**

**Project Location: Framingham, MA**

**Project Overview**

This \$2.5 million project required a 4-story addition to Hemenway Hall to include 68,000 sq. ft. of Organic, Inorganic, Analytical and Physical Chemistry teaching laboratories. It is currently the largest GreenFumeHood installation to date with 49 fume hoods featuring Erlab's GreenFumeHood Filtration Technology. As the industry's total solution provider, the goal of CiF Lab Solutions was to provide a safe working environment, while offering significant energy savings to help the lab in their pursuit of a LEED Silver certification.

- CiF Premium Wood Casework
- CiF Tech Center Table Systems
- Air Master Systems Green Fume Hoods
- Durcon Epoxy Tops

**Project Statistics**
