

Project Name: Owego Apalachin Elementary

Project Location: Owego, NY

Project Overview

The Owego Apalachin Elementary School classroom design required CiF Lab Solutions and our partner Northeast Interior Systems to think outside the box and get creative on this highly customized plastic laminate casework order. This K-12 project required modified plastic laminate casework fabricated with over 35 different color combinations, with some cabinets reaching heights of 10 feet. Custom pulls and hidden hardware requirements were also designed to give these cabinets a unique look at a lower cost, compared to the typical wood casework classroom.

- CiF Plastic Laminate Casework

Project Statistics

- Size: 120,000 sq. ft.
- Budget: \$700,000

Project Participants

- Architect: Highland Associates
- Laboratory Planner: N/A
- General Contractor: Daniel J. Lynch Inc.
- Dealer: Northeast Interior Systems
