

## ▶ Product Data Sheet

**Premium MDF** can be finished with an opaque, clear or stained finish. All our finishing processes are designed to meet or exceed SEFA-8 finishing specifications. Available in an array of standard colors or for custom projects, color matching is also available.

**SEFA Compliant Hardware:** Various choices that promise the highest quality and provide various function and aesthetic features.

**AWI Premium Stretcher Rail Construction:** Precision dowel pin joinery consisting of a front horizontal rail and two vertical back rails.

**AA Doors and Drawer Fronts:** Can be finished MDF or optional wood veneer plywood to offer an enhanced look.

**Flat-line Finishing System:** Ensuring compliance with AWI quality standards and SEFA-8 compliance. The most durable laboratory finish with board room quality appearance.

### Key Features

<b>Premium Quality</b>	Innovative design and use of materials make our M-Line casework a truly unique choice for your science room casework project. We utilize premium MDF panels with an opaque catalyzed vinyl finish to achieve a truly distinctive product line.
<b>Custom Design</b>	Our custom capabilities and parametric engineering allow us to provide our customers with endless configurations.
<b>Full Product Offering</b>	Fixed, mobile and suspended cabinet options, specialty cabinets (acid, flammable and vacuum pump) and ADA compliant in virtually any veneer species.
<b>Industry Compliance</b>	CiF delivers products that meet performance criteria and contribute to project regulatory standards such as SEFA, AWI-QCP, AWMAC, FSC and LEED contributions.
<b>True to Your Vision</b>	CiF has built a reputation on providing high quality products which meets and exceed the requirements of designers, planners and architects. We pride ourselves in being able to provide innovative solutions for demanding, quality driven clients, who require a level of sophistication not easily found in our industry. At CiF we always take pride in our work and we are always "True to Your Vision".
