Toxic Reduction Progress

The current reporting year saw increases in use for several substances primarily due to increase in the production level.

Plan Implementation Progress

In 2014 reporting year, one option under the equipment or process modification was implemented in order to reduce the use of the reportable substances at the part finishing process: Covered thinner pails while waiting for sludge to deposit of and turned off thinner finishing line cleaning unit while not in use. The step taken after implantation was to develop training program for the employees. No additional actions outside the plans were taken in 2014 to reduce the use and/or creation for any of the reportable substances. No amendments were made to the toxic substances reduction plans in 2014.

Annual Report Certification Statement
