# ELEVATION SERIES

An Adaptable Solution for the Evolving Science and Technology Classroom

Biology | Chemistry | Physics | STEM & STEAM

The Elevation Series by CiF Lab Solutions has the answer to your classroom demand for more flexibility. It **“stands up”** to the ever changing needs of multi-discipline environments, with both laboratory and teaching accommodations.

## Standard Features:

- Fixed or electric height adjustable.
- Work surfaces offered in epoxy or phenolic resin.
- Configurations available with or without sink accommodations.
- Gas services, power & data integration.
- Standard and ADA compliant configurations.
- Base pedestal available with metal, wood or plastic laminate closure panels.

# Elevation Series

## Choose From:

- Fixed or mobile storage cabinets are available in metal, wood and plastic laminate.
- Apron or deck mounted services.
- Remote control height adjustment of all tables.
- Deck mounted apparatus rods.
- Clip-on testing panels.
- Deck mounted demonstration mirrors.
- Lockable center storage compartment.

## An Instructor's Station Completes The Classroom...

This "command center" can accommodate classroom AV technology, various specialty cabinets, height adjustability and includes a sink location or it can be completely mobile.

# Our Design Build Experience

Our professional design partners can collaborate with your project team to consider your specific needs. **A custom approach** to your student or researchers' bench configuration is well within your reach.

## Ask Us About Our Design Build Experience:

- Space planning
- Owner / user programming
- Specification review
- BIM modeling
- Project budgeting
- Trade coordination
- LEED and sustainability contribution
- Ask about our State Contract availability
