

Project Name: Sacred Heart High School

Project Location: Waterbury, CT

Project Overview

NEIS renovated Sacred Heart High School's outdated science classrooms with the goal of converting the space into a college preparatory-like environment. NEIS provided CiF Lab Solutions' push-button height adjustable Elevation Tables, each equipped with an ADA compliant sink. The flexibility to accommodate current and future curriculums across grade levels made the Elevation Tables the perfect solution.

- CiF's Elevation Table
