Service Distribution

CiF Lab Solutions offers a variety of service distribution methods to accommodate ceiling, floor and wall requirements. All systems are designed to work in conjunction with CiF Lab Solutions workstations and C-Frame systems to create a complete laboratory system.

CiF Lab Solutions offers ceiling service panels that work in conjunction with flexible workstations utilizing vertical service distribution within their uprights. CiF Lab Solutions features the Wing[®] overhead service carrier used primarily with flexible workstations utilizing horizontal service distribution through service manifolds. In addition, CiF Lab Solutions offers the half Wing[®] system to accommodate perimeter applications

For any “Best-In-Class” service distribution solution, *let's talk*.

Wing[®]

Wing[®] Overhead Service Carrier

Features and Benefits

The Wing[®] is a starter and adder overhead service distribution system that is exible enough to work with your current or future service and communication needs and can be ordered to accommodate lighting, center snorkels and offset snorkels. Pre-plumbing, pre-wiring and exhaust options are available through CiF Lab Solutions. In addition, with longer lead times, custom uplighting can be ordered from CiF Lab Solutions.

The modular design of the Wing[®] allows for multiple units to join together with a single - or multiple - umbilical(s) feeding services throughout the units. The slim design of the Wing[®] makes it an ideal solution when ceiling height is limited. Ceiling suspension allows service connections along the entire system length. For services in the wall or ceiling fed perimeter needs, half Wing[®] wall-mounted versions are available.

Wing[®] Starters

Product Description and Characteristics

The Wing[®] distribution system is a formed steel suspended overhead service carrier that is designed to carry services including water, vacuum, gasses, electrical, data and communications. Each section shall have pre-punched plumbing and electrical fixture openings. To achieve multiple section runs, you must move one end-cap from the starter section to the end of the adder section. Only one starter unit is needed per run. For suspension, incorporate umbilicals and end umbilicals for every service run. Refer to our laboratory specifications for details.

Finish

All steel frame components shall be finished using a baked-on powder-coat finish. Standard colors include black, grey, platinum, and light neutral.

Pre-Plumbing and Pre-Wiring

Pre-plumbing and pre-wiring is available at the CiF Lab Solutions factory. All supply lines are systematically routed and securely clamped inside.

Fabrication

The Wing[®] is shipped in single (36-, 48-, 60-, and 72-inch) sections or in factory joined runs (final length may vary).

Warranty

All standard products manufactured by CiF Lab Solutions carry a two (2) year guarantee and Limited Warranty from the date of substantial completion to the original owner against defective material and workmanship. Refer to our full warranty for further details.

Half-Wing® Starter and Adder

Product Description and Characteristics

The Half Wing® distribution system is a formed steel suspended overhead service carrier that is designed to carry services including water, vacuum, gasses, electrical, data and communications and is used when an application is against the wall. Each section shall have pre-punched plumbing and electrical fixture openings. To achieve multiple section runs, you must move one end-cap from the starter section to the end of the adder section. Only one starter unit is needed per run. For suspension, incorporate umbilicals and right and left end umbilicals for every service run. Refer to our laboratory specifications for details.

Finish

All steel frame components shall be finished using a baked-on powder-coat finish. Standard colors include black, grey, platinum, and light neutral.

Pre-Plumbing and Pre-Wiring

Pre-plumbing and pre-wiring is available at the CiF Lab Solutions factory. All supply lines are systematically routed and securely clamped inside.

Wing® Plumbing Hoses

CiF Lab Solutions offers a wide array of options to suit your plumbing hose requirements. To order the hose for your fixtures, you must “build your own” six character model number. White is the color used if a service is needed that is not listed below. Options not listed are considered custom.

Plumbing Hose Model # Template

Plumbing Hoses ____ + Conguration __ + Color/Service ____ + Length __
= 6 Character Model Number

Step 1

Automatically use the letters “P” and “H” to indicate you are ordering a plumbing hose

Plumbing Hose – **PH**

Step 2

Select the type of configuration you need for your hose

3/8" FNPT and 3/8" FNPT - **0**
 3/8" FNPT and male quick connect - **1**
 3/8" FNPT and female quick connect - **2**
 Male quick connect and female quick connect - **3**

Step 3

Select the color and service

Color is BLACK and service is HELIUM - **K1**
 Color is ORANGE and service is AIR - **K2**
 Color is GREEN and service is WATER - **K3**
 Color is YELLOW and service is VACUUM - **K4**
 Color is BLUE and service is NATURAL GAS - **K5**
 Color is WHITE and service is MISC - **K6**
 Color is PURPLE and service is ARGON - **K7**
 Color is BROWN and service is NITROGEN - **K8**

Step 4

Select the hose length

1-Foot hose - **A**
 2-Foot hose - **B**
 3-Foot hose - **C**
 4-Foot hose - **D**
 5-Foot hose - **E**
 6-Foot hose - **F**
 7-Foot hose - **G**
 8-Foot hose - **H**
 9-Foot hose - **I**
 10-Foot hose - **J**

Wing® Plumbing Quick Connects

CiF Lab Solutions offers a wide array of options to suit your plumbing hose requirements. To order the plumbing quick connects, you must “build your own” five character model number. White is the color used if a service is needed that is not listed below. Options not listed are considered custom.

Plumbing Quick Connect Model # Template

Plumbing Quick Connect ____ + Conguration __ + Color/Service ____
= 5 Character Model Number

Step 1

Automatically use the letters “P” and “Q” to indicate you are ordering a plumbing quick connect

Plumbing Quick Connect – **PQ**

Step 2

Select the type of product configuration you are using with the quick connect

Wing/Ceiling Panel - **0**

Step 3

Select the color and service

- Color is BLACK and service is HELIUM - **K1**
- Color is ORANGE and service is AIR - **K2**
- Color is GREEN and service is WATER - **K3**
- Color is YELLOW and service is VACUUM - **K4**
- Color is BLUE and service is NATURAL GAS - **K5**
- Color is WHITE and service is MISC - **K6**
- Color is PURPLE and service is ARGON - **K7**
- Color is BROWN and service is NITROGEN - **K8**

Wing[®] Electrical Receptacles

CiF Lab Solutions offers a wide array of options to suit your electrical receptacle requirements. To order the electrical receptacles you must “build your own” seven character model number. Options not listed are considered custom.

Electrical Receptacle Model # Template

Electrical Receptacle __ + Product Use __ + Conguration __ + Grade __ +
Receptacle Cover __ + Cover Color ____ = 7 Character Model Number

Step 1 Automatically use the letters “E” and “R” to indicate you are ordering an electrical receptacle

Electrical Receptacle – **ER**

Step 2 Select the type of product conguration you are using with the electrical receptacle

Wing/Ceiling Panel - **0**

Step 3 Select the configuration

NEMA # 5-20, duplex receptacle - **A**

Wing[®] Plumbing Valves

CiF Lab Solutions offers a wide array of options to suit your plumbing valve requirements. To order the plumbing valves, you must “build your own” seven character model number.

Plumbing Valve Model # Template

Plumbing Valve __ + Conguration __ + Color/Service __ +
Product/Finish __ + Type __ = 7 Character Model Number

Step 1

Automatically use the letters “P” and “V” to indicate you are ordering an electrical receptacle

Electrical Receptacle – **PV**

Step 2

Select the type of product conguration you are using with the plumbing valve

Wing/Ceiling Panel - **0**

Step 3

Select the color and service

Color is BLACK and service is HELIUM - **K1**
 Color is ORANGE and service is AIR - **K2**
 Color is GREEN and service is WATER - **K3**
 Color is YELLOW and service is VACUUM - **K4**
 Color is BLUE and service is NATURAL GAS - **K5**
 Color is WHITE and service is MISC - **K6**
 Color is PURPLE and service is ARGON - **K7**
 Color is BROWN and service is NITROGEN - **K8**

Step 4

Select the product/finish

Standard/Chrome - **A**
 ColorTech/White - **B**
 ColorTech/Gray - **C**
 ColorTech/Tan - **D**
 ColorTech/Polished Chrome with clear epoxy - **E**
 ColorTech/Satin Nickel with clear epoxy - **F**
 ColorTech/Satin Chrome with epoxy - **G**

Step 5

Select the type of valve

Ball valve - **0**
 Needle valve - **1**
 Fine Control Needle valve - **2**

Wing[®] Dust Covers

Product Description and Characteristics

The dust covers are formed metal and used to cover the top side of the Wing[®] overhead service distribution system. Dust covers are ordered based upon final run length.

Finish

All steel frame components shall be nished using a baked-on powder-coat nish. Standard colors include black, grey, platinum, and light neutral.

Dust Covers For Wing[®] MODEL#: ODC0 + Total Run Length (03-30 in 1-Foot Increments)

Fabrication

The dust covers are shipped knocked down.

Warranty

All standard products manufactured by CiF Lab Solutions carry a two (2) year guarantee and Limited Warranty from the date of substantial completion to the original owner against defective material and workmanship. Refer to our full warranty for further details.

Ceiling Service Panels

Ceiling Service Panels

Product Description and Characteristics

The CiF Lab Solutions Ceiling Service Panels are a more economical method of providing connection to gas services, electric and data from the ceiling to your flexible workstation solutions configured below. Ceiling Service Tiles are available in standard sizes of 2-foot x 2-foot and 2-foot x 4-foot tiles, with customized configurations available to meet your project's specific needs. This page features two standard 24x24-inch ceiling panels.

Finish

All steel Ceiling Service Tile components shall be finished using a baked-on powder-coat finish. Standard colors include black, grey, platinum, and light neutral.

Fabrication

If no gas fixtures are installed at the factory, the hole will have a knock-out present that is removed when a fixture is installed in the field. If no electrical boxes are installed at the factory, there will be a hole cut-out for the box to be installed in the field. If electrical boxes are installed at the factory, they will have a metal duplex box and blank cover installed for field wiring.

Warranty

All standard products manufactured by CiF Lab Solutions carry a two (2) year guarantee and Limited Warranty from the date of substantial completion to the original owner against defective material and workmanship. Refer to our full warranty for further details.

Ceiling Service Panels Plumbing Valves

CiF Lab Solutions offers a wide array of options to suit your plumbing valve requirements. To order the plumbing valves, you must “build your own” seven character model number.

Plumbing Valve Model # Template

Plumbing Valve __ + Conguration __ + Color/Service __ +
Product/Finish __ + Type __ = 7 Character Model Number

Step 1

Automatically use the letters “P” and “V” to indicate you are ordering an electrical receptacle

Electrical Receptacle – **PV**

Step 2

Select the type of product conguration you are using with the plumbing valve

Wing/Ceiling Panel - **0**

Step 3

Select the color and service

Color is BLACK and service is HELIUM - **K1**
 Color is ORANGE and service is AIR - **K2**
 Color is GREEN and service is WATER - **K3**
 Color is YELLOW and service is VACUUM - **K4**
 Color is BLUE and service is NATURAL GAS - **K5**
 Color is WHITE and service is MISC - **K6**
 Color is PURPLE and service is ARGON - **K7**
 Color is BROWN and service is NITROGEN - **K8**

Step 4

Select the product/finish

Standard/Chrome - **A**
 ColorTech/White - **B**
 ColorTech/Gray - **C**
 ColorTech/Tan - **D**
 ColorTech/Polished Chrome with clear epoxy - **E**
 ColorTech/Satin Nickel with clear epoxy - **F**
 ColorTech/Satin Chrome with epoxy - **G**

Step 5

Select the type of valve

Ball valve - **0**
 Needle valve - **1**
 Fine Control Needle valve - **2**

Service Chase

Service Chase

Features and Benefits

The CiF Lab Solutions Service Chase is available with customized configurations to meet the project's specific needs. Project specifications should include where the Service Chase is to be mounted; floor-to-ceiling, casework-to-ceiling and service core-to-ceiling. The mounting location selected will determine the hardware needed for installation. Then, you must specify the size of the Service Chase (HxDxW), any pre-cutting for electrical, fixtures and access panels with your material selection (wood, laminate or metal and appropriate color combinations).

Fabrication

The Service Chase is shipped knocked down on pallets.

Finish

All steel Service Chase components shall be finished using a baked-on powder-coat finish. Standard colors include black, grey, platinum, and light neutral.

Warranty

All standard products manufactured by CiF Lab Solutions carry a two (2) year guarantee and Limited Warranty from the date of substantial completion to the original owner against defective material and workmanship. Refer to our full warranty for further details.

Example A: 6x9 Service Chase

Example B: 6x24 Service Chase
